

Autumn Vein-Cut Travertine

This selection of Rapolano Stone has the **typical colors of the countryside in autumn**, from which it takes its name. It is a color choice extracted from **quarries with a beige base**, selecting pieces of color **from light beige to brown** with some shades of **red**.

Its finish is **pebble**: the material is aged by tumbling, which gives it an antique look. If used for **flooring**, it can also be supplied in a thickness of 3 cm. If used in not very large formats, for example 20×40 cm, the material is suitable for driveways.

Given its technical characteristics, our Autumn travertine selection is **specific for outdoor use**.

Consult the technical information to see the various possible combinations of available formats.
